

Estifanos Gashawtena

AI/ML Engineer

■ estifanos17bayou@gmail.com ■ 0961646618 ■ Nairobi, Kenya

PROFILE

Experienced software engineer with nearly five years of industry experience, specializing in **AI systems, LLM evaluation, and Retrieval-Augmented Generation (RAG)**. Proven track record of building production-grade AI pipelines, assessing and enhancing LLM outputs, and embedding AI capabilities into real-world applications. Comfortable working with distributed, international teams while using Python, modern JavaScript/TypeScript, and cloud platforms to deliver scalable and dependable solutions.

PROFESSIONAL EXPERIENCE

LLM Trainer/PoD lead

02/2025 – 11/2025

Turing

Brazil

- Worked for clients like **Alibaba** and **Tencent** on Terminal Bench projects, I created quality datasets/tasks on different domains like data querying, machine learning, game development and others
- Got a promotion to become POD lead on Machine learning and model training domain for Terminal Bench 2.0 (Harbor), I led my team members, review submitted tasks and conduct KT session with my team.

Applied AI Engineer / ML Engineer - Remote

02/2023 – 04/2025

Aladia – Student Learning Platform ■

Italy

- Developed and integrated **AI-powered features** to support learning analytics, content discovery, and platform insights.
- Built data pipelines to process structured and unstructured user data, enabling ML-driven analysis of engagement and performance.
- Collaborated with backend and frontend teams to deploy AI-assisted services into a production Nuxt/Vue.js platform.
- Implemented monitoring and testing strategies to ensure reliability and correctness of AI-driven functionality.

Junior AI / Data Engineer - Remote

05/2022 – 08/2022

Student Get Rentals - rental platform ■

Texas, USA

- Supported data-driven feature development for a student housing platform.
- Built preprocessing scripts and analytics workflows using Python to prepare data for ML experimentation.
- Collaborated with senior engineers to align data structures with future recommendation and prediction use cases.

EDUCATION

Bachelors of Science in Software Engineering

09/2016 – 08/2024

Addis Ababa Science and Technology University ■

Addis Ababa, Ethiopia

AI & TECHNICAL SKILLS

AI / Machine Learning

- Large Language Models (LLMs)
- Retrieval-Augmented Generation (RAG)
- Prompt engineering & prompt optimization
- LLM evaluation, validation, and feedback loops
- Vector databases & embeddings

Programming & Frameworks

- Python (AI pipelines, evaluation, automation)
- JavaScript / TypeScript

Infrastructure & Tools

- Linux (daily driver)
- GCP, CI/CD pipelines
- Docker, Git
